### Rules on letting this property

Properties can be let if they have an energy rating from A+ to E.

### Energy efficiency rating for this property

This property's current energy rating is A.

Properties are given a rating from A+ (most efficient) to G (least efficient).

Properties are also given a score. The larger the number, the more carbon dioxide (CO<sub>2</sub>) your property is likely to emit.

### How this property compares to others

Properties similar to this one could have ratings:

If newly built

15 | A

If typical of the existing stock

60 | C

**KwP** kWp stands for kilowatt 'peak' of a system. The power is calculated under a standardised test for panels across all manufacturers to ensure that the values listed are capable of comparison.

**KwH** When the solar PV panels are operating they will convert the sun's radiance into electrical energy, which is measured in kilowatt-hours (KwH).

The performance of solar PV systems is impossible to predict with certainty due to the variability in the amount of solar radiation (sunlight) from location to location and from year to year. The estimate is based upon the Government's standard assessment procedure for energy rating of buildings (SAP) and is given as guidance only. It should not be considered as a guarantee of performance.

**EPC** A copy of the individual Energy Performance Certificates are available upon request.
